## Correction to: *BMC Ecol Evo* (2021) 21:157

<https://doi.org/10.1186/s12862-021-01886-7>

Following the publication of the original article [1], we were notified that:

1. The description of Fig. 2 was incorrect:
  - This image shows "an amphipod crustacean of the species *E. verrucosus* densely covered with an overgrown colony of parasitic ciliates. Ciliates living on weakened crustaceans are capable of forming vast colonies resembling a "fur coat"
  - Should read:
  - This image shows "an amphipod crustacean of the species *E. verrucosus* densely covered with an overgrown colony of parasitic ciliates and unknown oomycetes or fungi. These organisms on weakened crustaceans are capable of forming vast colonies resembling a "fur coat"
2. The caption of Fig. 2 was changed from "*Eulimnogammarus verrucosus*, a species of crustacean endemic to the UNESCO World Heritage Site Lake Baikal, suffering from a parasitic ciliate infection. Attribution: Kseniya Vereshchagina" to "*Eulimnogammarus verrucosus*, a species of crustacean endemic to the UNESCO World Heritage Site Lake Baikal, suffering from a parasitic ciliate **and**

**unknown oomycete (water mold) or fungi** infection. Attribution: Kseniya Vereshchagina".

3. The affiliations of the 3rd and 4th authors had been swapped by mistake.

The original article has been corrected.
